Integrating ChatGPT in Education: Enhancing Australian Curriculum Lessons

Professional Development Workshop - Using AI in Lesson Planning
with Gerard Alford
Editor and co-author of the *innovative teachers' companion*, the *beginning teachers' companion* and co-founder of *thinkdrive.com.au*

Gerard Alford
B.Econ. Dip.Ed M.Ed

Term 2, 2024 - Bundaberg,QLD

ChatGPT, used knowingly and well, can produce exciting, creative and curriculum-aligned lesson plans in seconds. It has the potential to deliver real time-savings for our profession, like no other technology. This workshop aims to familiarise teachers with the innovative use of ChatGPT in lesson planning and curriculum development, with a particular emphasis on customising ChatGPT lesson plans with proven cooperative learning tools and ensuring that all tasks are appropriately scaffolded to ensure student success.

Generating ChatGPT Lesson Plans

- ChatGPT Lesson plans: Capabilities and limitations
- ChatGPT and the Australian Curriculum: Aligning AI with educational standards
- Generating subject and age specific lesson plans

Customising ChatGPT with Cooperative Learning Tools

- Interactive Demonstrations: Using cooperative tools like Think:Pair:Share, Silent Card Shuffle, and Judge Jury with ChatGPT-generated content.

Scaffolding ChatGPT tasks

- Ensure all tasks are explicit and carefully scaffolded with cognitive verb aligned thinking tools and supportive language.
- Customising ChatGPT for higher-order thinking.

Who should attend?
All K-12 teachers and curriculum leaders across various subjects and grade levels. No knowledge of ChatGPT required.

Cost: $220 (inc. GST) includes morning tea and workshop resources

Note: Please bring a laptop / tablet. Please sign-up beforehand for the free version of ChatGPT
